

Risk Assessment to safeguard student while on placement

Students are expected to use this form to discuss generic risks with their key clinical educator on the first day during induction and orientation. Students are then to take the form to the different practice areas on other days to assess specific risks associated with individual practice areas.

Once this form has been completed and the student can demonstrate that he/she is aware of the possible risks and precautions to take in order to minimise potential risks, a photocopy should be kept in the practice area's "student" folder. The student keeps the original.

		Practice Area	Risk	Action to be taken to minimise risk	CE and student initials
